

Atlas Concrete Accessories

ATLAS BAR

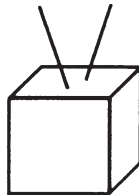

The Atlas Bar is a heavy-duty tool that has many uses on any jobsite, from stripping forms to jockeying tilt-up panels. The handle is fabricated from 1 x 2 tubular steel which is carefully mig-welded to a heat-treated milled blade.

CONCRETE SUPPORTS

WIRE DOBIES are furnished with two 16 gauge wires for attaching to rebar or mesh. Wire Dobies can be used in all concrete slab applications and vertical applications as a side form spacer.

WIRE DOBIES	Cover Height	Quantity per Bag
1-1/2" x 1-1/2" x 1-1/2"	1-1/2"	96
2" x 2" x 2"	2"	80
3" x 3" x 3"	3"	N/A

BLACK ANNEALED No. 9 WIRE

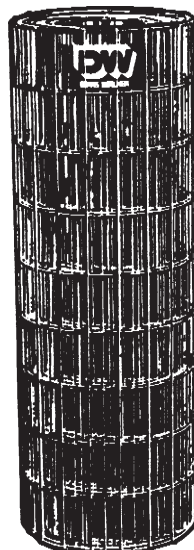

TIE-WIRE 16-1/2 GA.

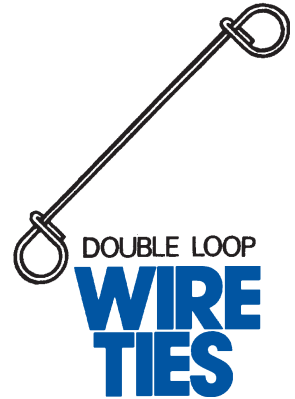

WIRE MESH

6" x 6" X w1.4" x w1.4"

Roll Size
7'6" x 200'
5'0" x 150'

American Wire Tie has been supplying wire and wire products to industry, construction and agriculture since 1934. As a major supplier of double-loop wire ties we offer the quality you expect from an American supplier.

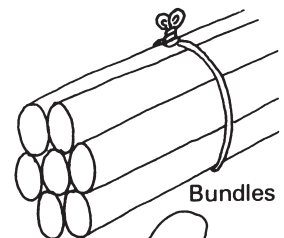

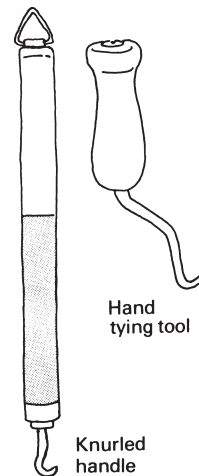

American Wire Ties are made of dead soft-annealed wire - pliable yet tough, easy to twist but practically unbreakable - insuring the safest and best possible delivery of your product.

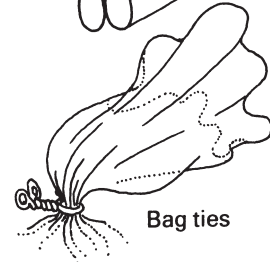

The ease of using American Wire Tie double loop wire ties requires no skilled labor and quickens production schedules.

Packed in new burlap tubing in rolls of 5000, overall wire tie lengths range from 3" to 36", in gauges 19 through 12.
