

SYLVAN

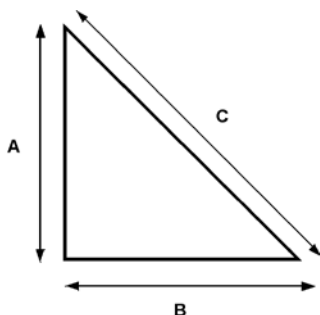

... For lasting impressions in architectural concrete.

Chamfer and Reveal Strips

Chamfer and Reveal Strips are precision machined in terms of size, shape, and surface smoothness, as well as other preferred attributes such as dimensional stability and resistance to splitting during nailing.

- **Wood Chamfers** – Produced out of clear Ponderosa Pine.
- **Poly Comp Chamfers** – Manufactured from recycled poly foam.

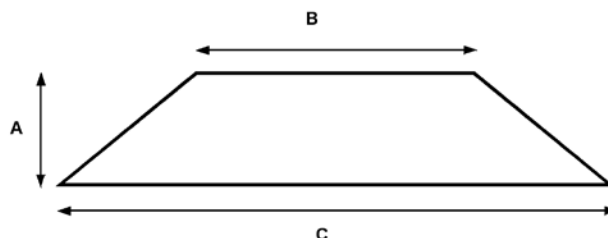

Common Chamfer Sizes

A	B	C
1/2"	1/2"	0.707"
3/4"	3/4"	0.972"
1"	1"	1.414"

Chamfer Cutter

The Miter Jaws™ Chamfer Cutter is a deluxe hand tool that provides precision miter cuts on the job-site, both quickly and accurately. It is uniquely designed with dual templates to enable right or left angle cuts on chamfer and moulding up to 1" in thickness. Fabricated with high-grade steel, chrome plating, a safety latch, and a replaceable blade and anvil, the chamfer cutter will provide safe and reliable performance for many years. Its compact size enable it to be carried in a pocket, or Sylvan holster.
