

ACRYLIC-TIE™

ICBO #5791

The one – easy dispensing, fast cure anchoring adhesive to use all year long.

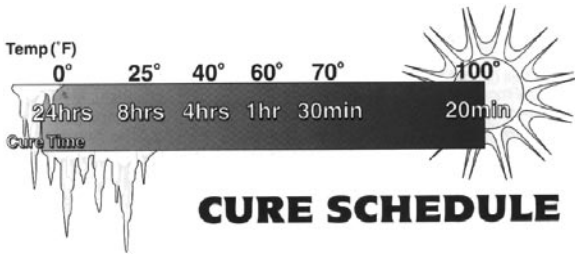

Dispenses quick and easy at any temperature, even at 0°F.

The outstanding cold-flow properties of Acrylic-Tie make dispensing nearly effortless. In addition to being easy to work with, dispensing tool life is extended.

Increases productivity on the job.

Anchors can be put in service in minutes or hours instead of days, so jobs get completed faster! In all but the coldest weather, anchors can be installed and bolted up the same day. At 70°F, Acrylic-Tie is fully cured in 30 minutes. See the chart for full range of cure times.

CURE SCHEDULE

Works where you work.

For a product to work well, it has to work in the real world, not just the test lab. Acrylic-Tie was formulated to perform in specific service conditions like damp holes, repeated freeze-thaw situations and in temperatures up to 100°F. The thixotropic-paste consistency stops flowing when you release pressure on the tool. This reduces mess and waste, and adhesive stays in the hold in horizontal applications.

No compromises.

The load table show outstanding bond strength in concrete, with no reduction at cold temperature. Plus, the formulation is free of Styrene and Methacrylic-Acid. An important consideration when working in occupied spaces.

Acrylic-Tie.

The latest example of Simpson's "No Equal" reputation for making better structural connections.

30 oz Model AT30
Large cartridge provides the lowest cost per hole

Mixing Nozzle Model EMN37

Acrylic-Tie Dispensing Tool Model ADT30

- Durable nylon reinforced handle
- Easy release brake
- Hi-power drive
- Handle under carriage for balance

OR

Acrylic-Tie Dispensing Tool Model ADT30P

- Pneumatic powered
- Power-reverse

8 oz Model AT08

- Convenient size for small jobs
- Fits Hilti P2000

OR

13 oz Model AT13

- Economic size for most

Mixing Nozzle Model AMN813-RP5
Five Mixing -Nozzles for 8 oz. and 13 oz. Acrylic-Tie Cartridges.

Acrylic-Tie Dispensing Tool Model ADT813 accepts 8 oz or 13 oz cartridges

- Durable reinforced nylon frame
- Easy release brake
- Hi-power drive
