

GREENSTREAK®

HOPPERS

Greenstreak HOPPERS are 36" square and are made of heavy duty plastic for multiple uses. The discharge can be easily cut to the desired opening. Each HOPPER has two brackets to quickly attach Collars.

The discharge is graduated to accept 6", 8" or 12" diameter Elephant Trunk.

STEEL COLLARS

STEEL COLLARS with chains are available to quickly connect and disconnect Elephant Trunks from the Hopper.

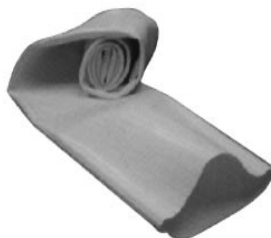

Two sizes are offered for 8" and 12" diameter Elephant Trunk.

STEEL CLAMPS

STEEL CLAMPS are used to attach Elephant Trunks to either a Steel Collar or directly to Greenstreak Hoppers.

STEEL CLAMPS are adjustable to fit all sizes of Elephant Trunk offered by Greenstreak.

ELEPHANT TRUNK

ELEPHANT TRUNK simplifies difficult pours. The lightweight, flexible drop chute is ribbed for extra strength. ELEPHANT TRUNK attaches easily to concrete hoppers using steel clamps. Because of its flexibility, ELEPHANT TRUNK can be used to make practical concrete drops under awkward conditions.

Available in 6", 8" and 12" diameters.
